# redburger.org – adding content

To add new content to the site make sure you are logged in (toolbar should be at the top of the page), then click the '+ New' button in the toolbar.

This will take you to the Add New Post page.

Note that this takes you to the dashboard view (black menu on the left hand side). Once here, you should enter a title for the post. There are several controls on the Add New Post page. Initially you don't need any of them. Just type a title, type some content, then hit Publish.

If you're typing a lot or want to come back later and don't want to publish the page just yet, you can hit the 'Save Draft' button and come back to it later.

You can always go back and modify any posts you've created, or delete them, or add pictures or links or ???
